

## Songwriting for iPhone

Hum combines note-taking and audio recording into a single app for capturing and organizing all your songwriting ideas. Hum organizes all your lyrics and melodies in one sortable place so you never lose a riff again. Hum isn't going to autotune your voice or let you produce a film score, but it is going to make you a more organized songwriter—on the bus, in bed, everywhere. We think that's pretty damn important.

### Key Features

- Sorting by key, tuning and mood to help you stay organized.
- Quickplay from the home screen to avoid drilling down into your library.
- Full page of notes, independent of lyrics for every song.
- Share songs with bandmates and friends via imessage and email.
